

# Venkatkrishna Vanaparthi

Associate Architect - Mobility

[vvkrishna1989@gmail.com](mailto:vvkrishna1989@gmail.com), +91-9059459571

---

## **PROFESSIONAL SUMMARY:**

- Total 14+ Years of experience in Information technology in developing high end enterprise level Android, iOS and UWP applications using Xamarin, MAUI and Flutter.
- Having experience of migrating from Xamarin. Forms to MAUI
- Having experience migrating from Xamarin. Native to MAUI
- Experienced in the Leading Team as a Lead developer as well as Architect.
- Experience in Native Android, Java.
- Having experience in web application development with ASP .NET MVC,HTML,CSS, JavaScript/JQuery, Azure Microservices.
- Having experience in windows application development with WPF.
- Having Fullstack development work experience with Mobile, Windows and Web development.
- Having experience in Architecting mobile applications.
- Having Good knowledge in end-to-end application life cycle for both iOS and Android.
- Well versed with AGILE development and its applications.
- Performed a wide variety of programming assignments of newly developed software applications, enhancements to existing applications, and other revisions to the product.
- Strong in the complete Software Development Life Cycle (SDLC) including requirements definition, design, programming / testing and implementation of major systems and involved development and deployment of many client/server systems based on TDD etc.
- Experience in using REST and SOAP APIs to get data and pass data to servers.
- Pleasant experience in the development of software systems using Microsoft .NET Standard 2.0 and PCL, .net 6.0, .net7.0, .net 8.0
- I worked on MVVM cross Framework in Xamarin Native.
- Experience in creating CI/CD pipelines with Codemagic and Appcenter.
- Experienced in writing UNIT test cases by following TDD.
- Experienced in integrating external scanners for scanning barcodes. ex: ZEBRA
- Experienced with developing constraint layout using xml in Android.
- Experienced in writing Custom renders, Behaviors, Effects and Triggers in Xamarin.Forms.
- Experienced in integrating with Azure Active directory for Single Sign On.
- Good knowledge of OOPS concepts and SOLID principles.
- Having good knowledge in design patterns.
- Proficient and up to date in C#, with a solid foundation in object-oriented programming and the .NET ecosystems
- Proficient in using version controls like GIT, TFS and SVN
- Strong self-starter and Strong analytical and problem-solving skills.
- Knowledge in customizing and enhancing the application based on client's requirement.
- Ability to work independently and manage multiple tasks concurrently.
- Ability to understand and start working on new technologies quickly.
- Actively participated in clients calls for gathering project requirements.

**TECHNICAL SKILLS:** C#, .NET, Java, Xamarin, MAUI, Flutter, WPF, ASP .NET MVC, Azure Microservices, HTML, CSS, JavaScript, JQuery, Android, iOS

## **WORK EXPERIENCE:**

**Concentrix Catalyst** - Associate Architect from Apr 2016 to Present

**Mold-Tek Technologies** - Software Developer from May 2015 to Apr 2016

**Valuelabs Pvt Ltd** - Senior Software Engineer from June 2014 to May 2015

**23Neem Systems Pvt Ltd** - Lead Software Engineer from Mar 2013 to May 2014

**Dharani Info Technologies Pvt Ltd** - Software Engineer from Oct 2011 to Mar 2013

## **EDUCATION:**

- Bachelor's in Information Technology from JNTU , India 2011.

## **PROJECTS:**

### **myTrackMobile**

myTrackMobile is a mobile application for tracking and authenticating worker activities on both Android and iOS platforms.

**Role:** Technical Architect

#### **Responsibilities:**

- Developed a cross-platform application which runs on Android and iOS using Xamarin.Forms and MAUI.
- Migrated Xamarin.Forms to MAUI
- Maintain the application UI and Functionalities with the changes made by the UX team for releases.
- Created Codemagic CI/CD Pipelines to generate IPA and APK and publish to GooglePlay and AppStore.

**Environment:** C#,MAUI, Xamarin.Forms, Xamarin.Android, Xamarin.iOS, Visual Studio, SQLite.NET, Codemagic

### **VirtualGate**

VirtualGate is an Android & iOS application to track the workers IN & OUT times. Based on these IN & OUT times Workers will be paid for their work. These will be operated by the Field Supervisor.

**Role:** Technical Architect

#### **Responsibilities:**

- Developed a cross-platform application which runs on Android and iOS using Xamarin.Forms and MAUI.
- Migrated Xamarin.Forms to MAUI
- Maintain the application UI and Functionalities with the changes made by the UX team for releases.
- Created Codemagic CI/CD Pipelines to generate IPA and APK and publish to GooglePlay and AppStore.

**Environment:** C#,MAUI, Xamarin.Forms, Xamarin.Android, Xamarin.iOS, Visual Studio, SQLite.NET, Codemagic

## Progress

Progress is an Android and iOS Mobile application developed in Xamarin & MAUI. This application provides detailed information about Man hours which is entered by Foreman in the field. This app will sync the entered Foreman hours, tasks to the server and it will get the information about particular Foreman hours from the server.

**Role:** Technical Lead

### Responsibilities:

- Developed a cross-platform application which runs on Android and iOS using Xamarin.Android, Xamarin.iOS and .NET Android, .NET iOS.
- Migrated Xamarin.Android to .NET Android and Xamarin.iOS to .NET.iOS.
- Maintain the application UI and Functionalities with the changes made by the UX team for releases.
- Created Azure CI/CD Pipelines to generate IPA and APK and publish to AppCenter.

**Environment:** C#,MAUI, Xamarin.Android, Xamarin.iOS, .NET Android, .NET iOS, Visual Studio, SQLite.NET, AppCenter

## MyTrack

MyTrack is a web application to track and manage the organization workers information.

**Role:** Backend Developer

### Responsibilities:

- Worked on Azure micro services.
- Worked on SQL Server.
- Worked on SQL Statements.

**Environment:** Visual Studio, Azure, .NET, SQL, SQL Server

## IMRS(Intermodel Maintenance and Repair System)

IMRS Mobile is a Windows Mobile application for monitoring and logging the repairs which are related to Rail-Road containers and its related equipment. This app will mainly focus on Inspection and Repair.

**Role:** Windows Application Developer

### Responsibilities:

- Developed Windows application with the help of WPF.
- Developed services using WCF.

**Environment:** C#, .NET, WPF, WCF, Visual Studio

## Nera

Nera is an Android & iOS mobile retail execution dynamic application with the help of Salesforce.

**Role:** Xamarin Application Developer

### Responsibilities:

- Developed Application for Xamarin Natives for iOS and Android.
- Involved in architecture of the project and maintaining the MVVM form across the code.
- Involved in checking the code in GitHub and maintaining the logic.
- Involved in App distribution for the User population based on the release environment.
- Involved in designing and creating complex and dynamic UI pages on Xamarin. PCL like iOS, Android and windows tablet using C#.

- Created custom renderers like list views with button, Bendable picker, print manager, Date picker and renderer for showing PDF as a web view.

**Environment:** C#, Xamarin. Natives, Xamarin.iOS, Xamarin. Android, Visual Studio for Mac, Xamarin Test Cloud, MVVMCross

## Legal Plex Mobile

This is an Android and iOS application for Attorneys to handle Traffic & Criminal cases in a simple and efficient manner.

**Role:** Xamarin Application Developer

### Responsibilities:

- Developed Application for Xamarin Android, Xamarin iOS.
- Involved in checking the code in GitHub and maintaining the logic.
- Involved in App distribution for the User population based on the release environment.
- Handled the performance and memory of Android & iOS App.

**Environment:** C#, Xamarin.Android, Xamarin.iOS, SQLite, Visual Studio, MVVMCross

## Vue

Vue is about shopping when you want, however you want and still having friends and experts help you along when you are looking for something. Just ask our users what looks good or what to wear for that first date or even help you find a pair of shoes that goes with that perfect dress! Come and be an early member of our community and help us get your friends on too so you have people you care about giving you suggestions.

**Role:** Xamarin Application Developer

### Responsibilities:

- Developed Application for Xamarin Android, Xamarin iOS.
- Involved in checking the code in GitHub and maintaining the logic.
- Involved in App distribution for the User population based on the release environment.
- Handled the performance and memory of Android & iOS App.

**Environment:** C#, Xamarin.Android, Xamarin.iOS, SQLite, Visual Studio, MVVMCross

## Mobile Device Management

### Project Description:

MDM is a android application to give limited access and monitor the use of mobile devices by employees in an organization.It limits the access of social networking applications, cameras & accessing different URLs in the android device.

**Role:** Android Application Developer

### Responsibilities:

- Developed Application for Native Android.
- Involved in checking the code in GitHub and maintaining the logic.
- Involved in App distribution for the User population based on the release environment.
- Handled the performance and memory of Android.

**Environment:** Java, Android, SQLite, Android Studio

## **Monkeys on the Bed Game**

MONKEYS ON THE BED is an Android gaming application. Have fun while you learn to count! Reinforces number identification and sequencing in two fun and playful ways. Game Play -Practice counting to 10 as you add monkeys to the game. Tilt the phone or swipe monkeys to make them fall off the bed. Call the Doctor anytime! Video- Practicing counting backwards from 5 to 1 Parent friendly music and no annoying sound effects make this an app that everyone can enjoy.

**Role:** Android Application Developer

**Responsibilities:**

- Developed Application for Native Android.
- Involved in checking the code in GitHub and maintaining the logic.
- Involved in App distribution for the User population based on the release environment.
- Handled the performance and memory of Android.

**Environment:** Java, Android, SQLite, Android Studio
